

Add Widget

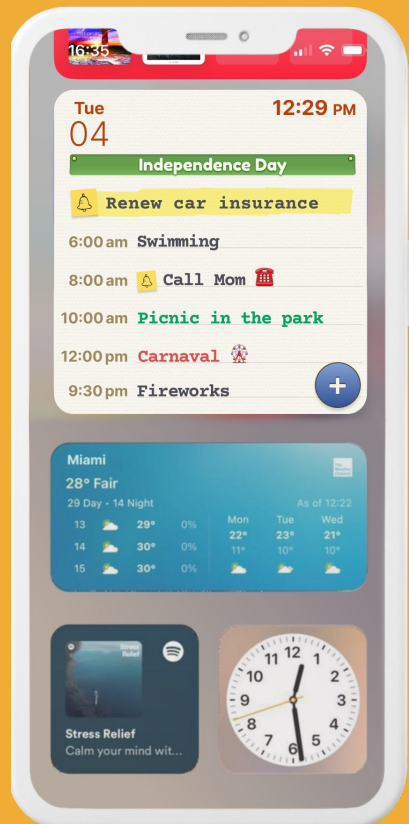

Add Widget

A widget acts sort of like “pinning” your favorite apps to your main phone screen with a larger “button” to give you a faster shortcut access to important information.

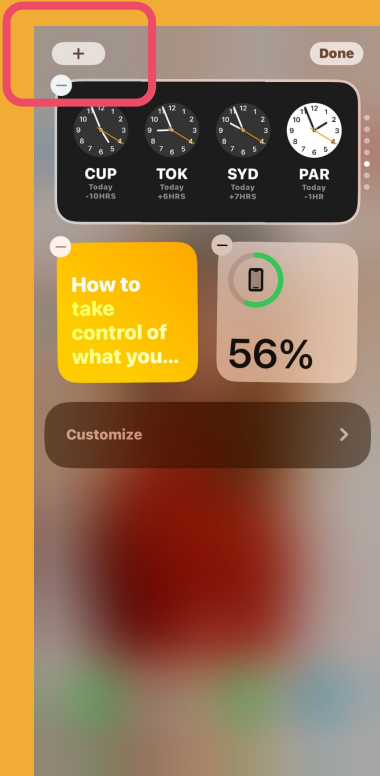

They HeyLife allows you to see what’s happening in your day. Is there a holiday or other special day? Is there something you’re supposed to remember to do? What events do you have on the docket?

The HeyLife widget is a great way to stay on top of important things and quickly access our favorite apps.

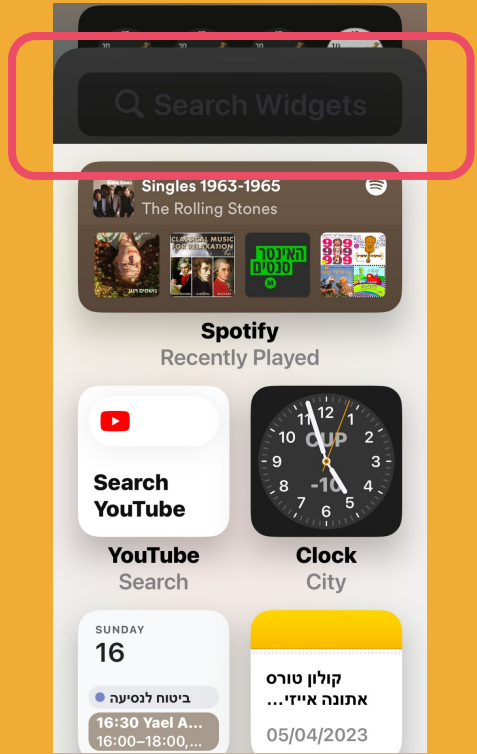

Add Widget - iOS
