# Weather

In order to see the weather in your location, you must authorize the app to access the location.

Press **Update Location**.

This will prompt a 2-step popup to confirm your permission to access your location (so that your app can provide you with your local weather).

a. HeyLife's popup notification that we need your permission to use your location to show you your local weather.

b. The permission popup. Here you'll need to confirm sharing the location by selecting **Allow While Using App**.

Weather

In case you choose to **Skip** location sharing , you will be offered to enter a city name to get local weather for a general area.

To see your local weather
we need permission
to use your location.
